Createspace Independent Publishing Platform, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Be the Change your Institution Needs What are leaders in research saying about Data Science in Higher Education? Where has this book been all these years? This is THE starting point for researchers looking for a leg up in today s college environment. Two parts discussion, one part methodology, and one part witty humor. I love it! Buy this book for your analysts. They and your college will thank you. This is the only book on data science specific for higher education research that covers both theory and practice. I m not a programmer at all, and I found this book very enjoyable. You wont regret it -- I know I don t! When our department was tasked with coming up with a predictive machine-learning model, we hired Jesse to help us. His charisma and knowledge are unmatched, and this book only helps to breathe fresh life into issues in research today that are all too often swept under the rug. Discover the tools to take your institution to the next level! Data Science in higher education is the process of turning raw institutional data into actionable intelligence. With this introduction to foundational topics in machine learning and predictive analytics, ambitious leaders in research can develop and employ sophisticated predictive models to better inform their institution s decision-making process. You don t need an advanced degree in math or statistics to do data science. With the open-source statistical programming language R, you ll learn how to tackle real-life institutional data challenges (with actual institutional data!) by going step-by-step through different case studies. Topics include: Simple, Multiple, Logistic Regression Techniques, and Naive Bayes Classifiers Best Practices...
