Georgetown University Press, United States, 2009. Paperback. Book Condition: New. 3rd Revised edition. 254 x 188 mm. Language: English . Brand New Book ***** Print on Demand *****.For nearly fifteen years Practical Decision Making in Health Care Ethics has offered scholars and students a highly accessible and teachable alternative to the dominant principle-based theories in the field. Devettere s approach is not based on an ethics of abstract obligations and duties, but, following Aristotle, on how to live a fulfilled and happy life-in short, an ethics of personal well-being grounded in prudence, the virtue of ethical decision making. This third edition is revised and updated and includes discussions of several landmark cases, including the tragic stories of Terri Schiavo and Jesse Gelsinger (the first death caused by genetic research). Devettere addresses new topics such as partial-birth abortion law, embryonic stem cell research, infant euthanasia in The Netherlands, recent Vatican statements on feeding tubes, organ donation after cardiac death, new developments in artificial hearts, clinical trials developed by pharmaceutical companies to market new drugs, ghostwritten scientific articles published in major medical journals, and controversial HIV/AIDS research in Africa. This edition also includes a new chapter on the latest social and political issues in American health care. Devettere s engaging text relies on commonsense moral concepts and avoids academic jargon. It includes a glossary of legal, medical, and ethical terms; an index of cases; and, thoroughly updated bibliographic essays at the end of each chapter that offer resources for further reading. It is a true classic, brilliantly conceived and executed, and is now even more valuable to undergraduates and graduate students, medical students, health care professionals, hospital ethics committees and institutional review boards, and general readers interested in philosophy, medicine, and the rapidly changing field of health care ethics.
